

Installation Instruction For 24301

It is recommended that this fixture be installed by a licensed electrician.

1. Turn off breaker at electrical panel
2. Install the nipple(B) to coupler(A) using hex nut (F1)
3. Adjust the hex nut (F2) first, then put the metal washer(C), rubber washer(D), glass diffuser(E), another rubber washer (D1), metal washer (C1) to the nipple (B), then secured by coupler (F)
4. Install lamp part(G) to the coupler(F)
5. Adjust arms(H) are level, then hang the crystal(I) on the arm(H) one by one
6. Install 75 watt bulbs into sockets.

Warning!!! lamps burn extremely hot. Turn fixture off and allow bulbs to cool at least 15 minutes before touching.
