BARITONE

Squares of Satin White glass are supported by flat Polished Chrome end caps with an extruded aluminum frame. Housed on the backside of the LED vanity light is a device to select from 5 color temperatures: 2700k-3000k-3500k-4000k-5000k. A dual mounting backplate allows for the fixture to seamlessly install to a switch box making the glass appear as if floating on the wall. An additional mounting bracket and cover plate is included in the packaging to accommodate larger junction boxes. Enhancing these features with a range voltage 120-277V input, makes this heavy hitting note land squarely into specification requests as well as the home improvement do-it-yourselfer.

- Satin White glass with Polished Chrome (PC) or Satin Nickel (SN) Caps
- Dual Mounting System on either switch box or standard 3-0 and 4-0 junction box
- Range Voltage 120-277V Input
- Dimmable with ELV at 120V

LINE

The use of a line is one of the most basic elements of architectural design. Lines define the shape, form and volume of a design solution. With this driverless solution, solid lengths of machined aluminum encase a high powered LED to brightly illuminate structures without glare. Accentuate those great lines with an indirect lighting product as well built as its architectural environment.

LINE

- ETL & cETL wet location listed, IP65 rated
- ADA Compliant
- Indirect back lighting
- Long lengths available (up to 8")
- Cast and Machined Aluminum

BLOK

The classic cube form has become a staple in modern lighting design. This option has been specified to minimal extension for ADA compliance. This product offering is not only commercially rated, but economically priced with IP ratings that allow installations either indoors or in the great outdoors. The high powered LED light engine is low voltage and includes a range voltage driver to conveniently meet various site requirements.

- ADA Compliant
- Down-light and Up/Down Light Configurations
- Range voltage 120-277V drivers included
