

The Akimbo is a 2023 NY Product Design Award Winner

City of Industry, CA – 11.6.23 – A trailblazer of innovative design, Maxim Lighting is proud to announce the Akimbo chandelier collection as a [Gold 2023 New York Product Design Award](#) winner in the Lamps & Luminaries category.

The New York Product Design Awards honor exceptional product designs and manufacturers. A competitive celebration of design excellence, Product Design Award nominees are judged on creativity, functionality, and their overall aesthetic. To be awarded Gold is a testament to the Akimbo's seamless balance of artful style and craftsmanship.

A transitional statement piece, the Akimbo is composed of walnut-stained oak and Satin White glass shades that light up pleasantly and glare-free. The collection is available as a series of multi-light chandeliers and a wall sconce with a swingable arm. Creating a fixture of mixed materials that balances aesthetics with functionality is no small feat, and to be recognized for such an achievement is a great honor.
